We do not have responsibility with copywright of this book.

This book examines the evidence for literacy in early medieval Italy under the rule of the Lombards, the last of the barbarian invaders who established a kingdom in north and central Italy from 568 to 774. By examining different kinds of written documentation (legislation, charters, inscriptions and manuscripts), the study reveals that Lombard Italy actually possessed a relatively sophisticated written culture prior to the so-called Carolingian Renaissance of the ninth century.
